

## **Student access to textbook resources through MYeCLASS Student Portal**

GCPS students will be able to log on to the new MYeCLASS Student Portal to access digital textbooks and resources.

Prior to accessing MYeCLASS Student Portal, each student will need to log into a GCPS computer with his or her student number to establish a new Active Directory (AD) password. When the new AD password is entered, it will be pushed to the portal so the student number and password combination will be the same for both AD and the student portal.

The following link is active on the GCPS web page for students to access the MYeCLASS Student Portal.

When a student logs into the portal, the screen will display thumbnail images of the books associated with the student's SASI schedule. By clicking on the images, students have direct access to the textbook resources with no other login or password required.

If you or your students have questions about the student portal, first contact your school technology team. If further assistance is needed, please coordinate with your school technology team to contact Customer Support.
